

Magic Walls

Interactive LED Artwork

Fascinate your
guests
clients
consumers
visitors
patients

- Any Shape
- JAVA programmable
- 24 bit RGB light

Attract More People

Give your Shopping Center additional attention with the innovative and interactive Christmas tree. A true world novelty that draws the attention of young and old.

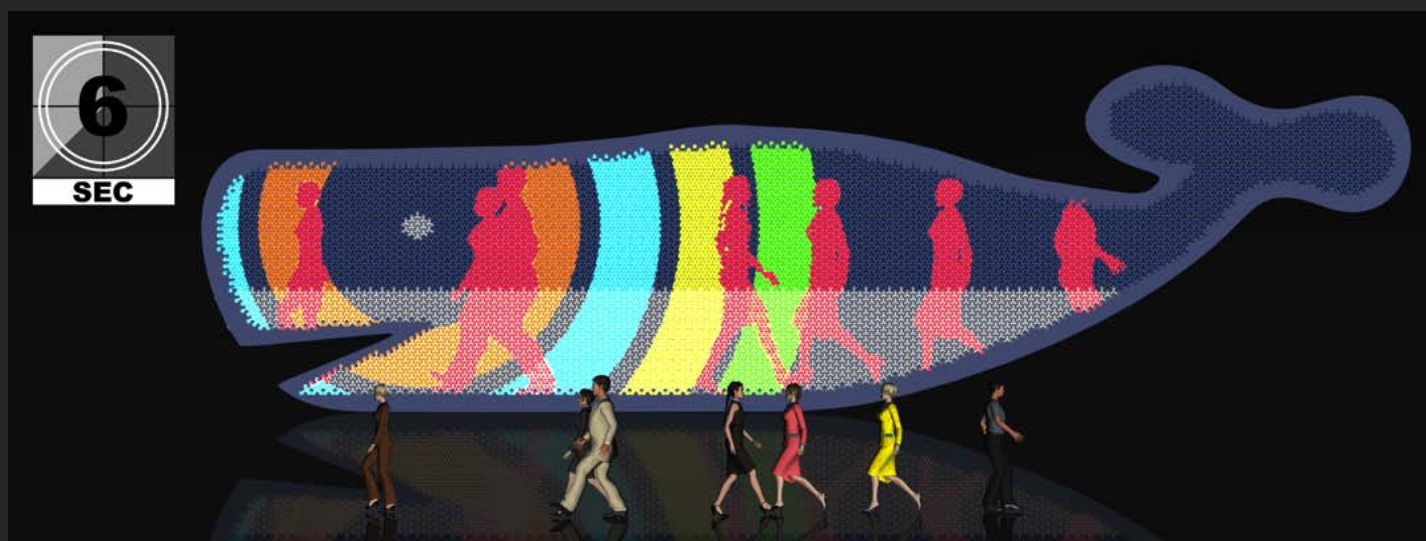

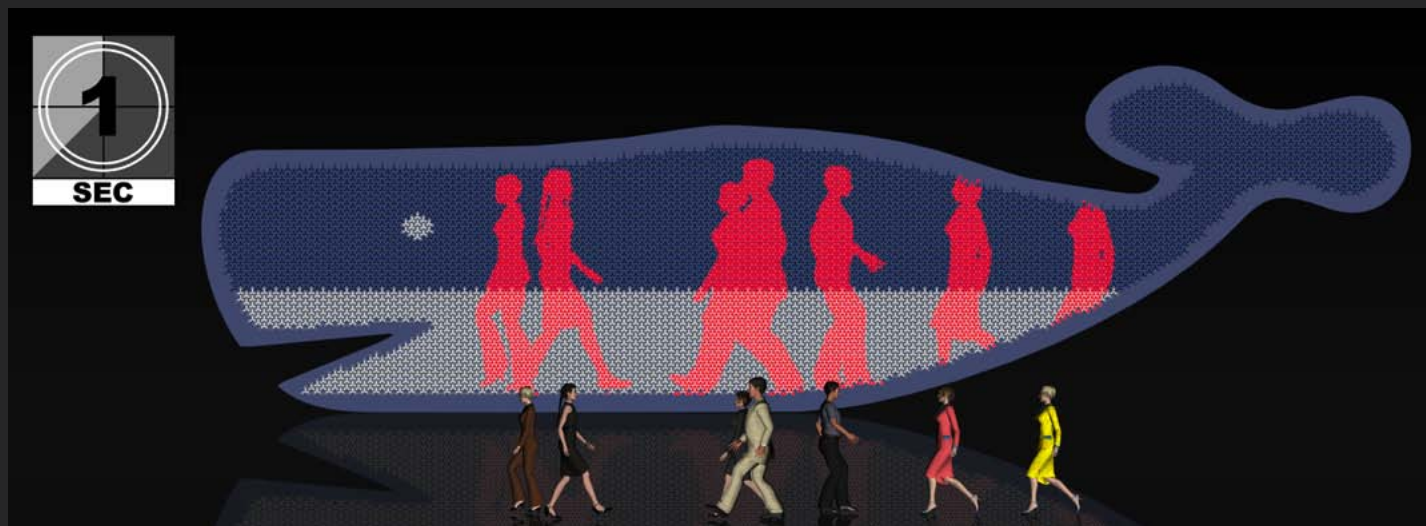

Its surprising with interactive functionality by simply passing by, in addition with a periodic special event, people will be gladly waiting for. Then the Christmas Tree turns into an interactive game.

Color, construction and content is widely adaptable to your needs and space in the center.

Active Game: Find the hidden present box

Museum Entrance Area

People passing by, generate enlarged silhouettes and trigger colored waves when passing the wales eye.

Any Shape

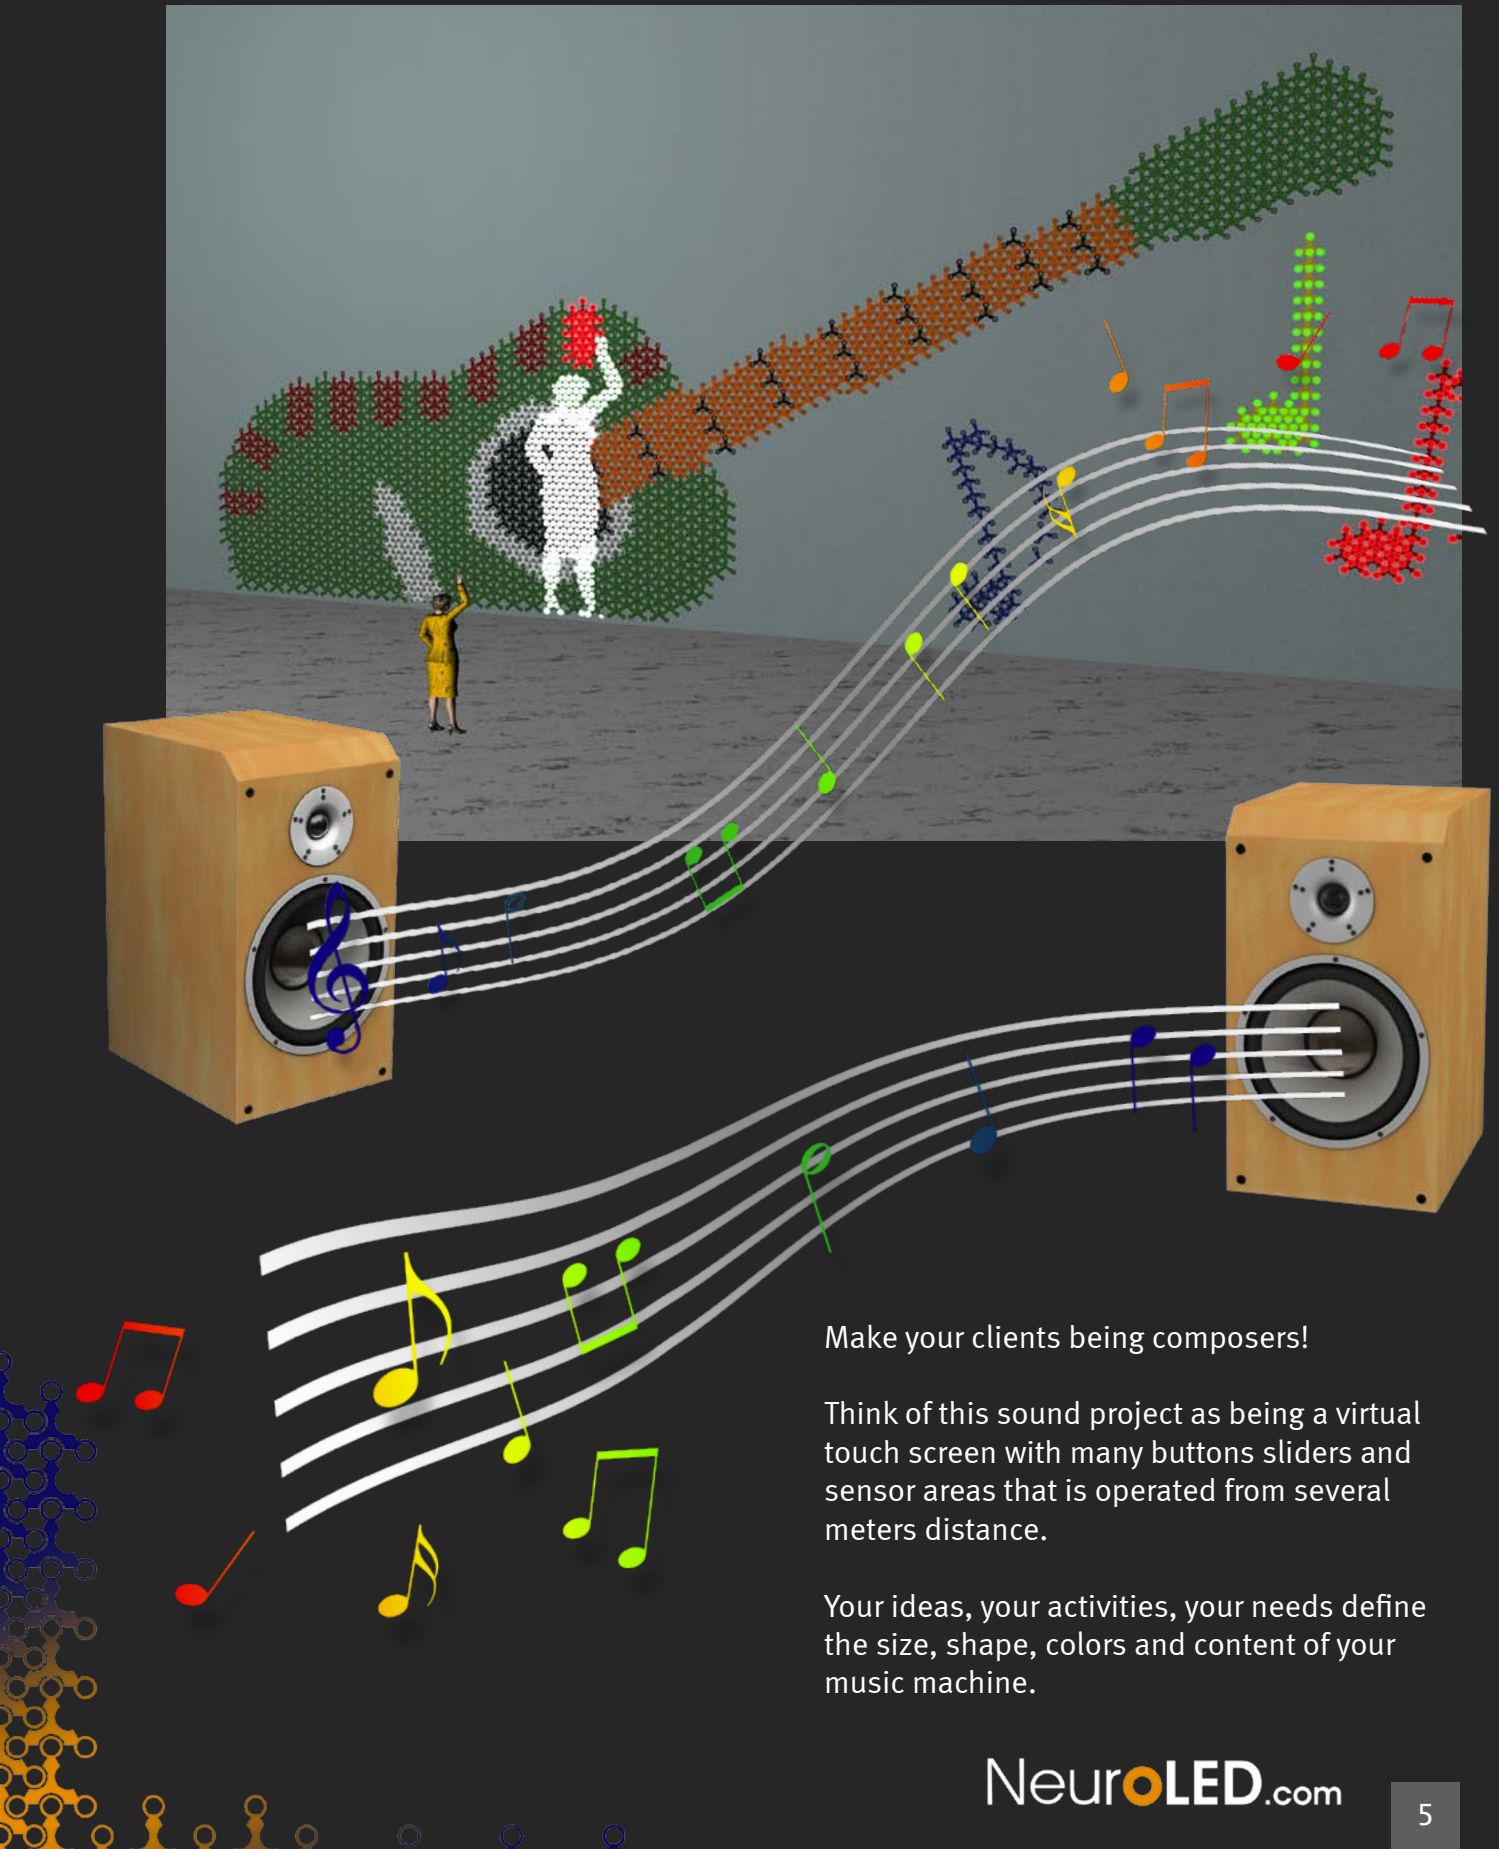

Any Effect

- One person, generating multiple, time-delayed silhouettes.
- Most elementary and easy to understand.
- Catch peoples attention and make them play for a moment.

The Music Machine

Make your clients being composers!

Think of this sound project as being a virtual touch screen with many buttons sliders and sensor areas that is operated from several meters distance.

Your ideas, your activities, your needs define the size, shape, colors and content of your music machine.

Attract People in Any Place with NeuroLED

• in hotel lobbies

• at airports
